

FLEX PLANTERS +EDGING

For Biophilic
Commercial Projects

Modular | Scalable | Customizable

YOU DESIGN. WE BUILD.

Custom Planters and Plant Edging Systems to fit your projects needs.

USE CASES

ROOFTOP TERRACES

Integrates with standard roof tile systems

PUBLIC SPACES

Custom-built solutions for any space

PRIVATE SECTOR

Universities, Business Parks and more

OUR PROCESS

COLLABORATION

The process begins with a collaboration session where we learn about your design intent and all the details of your project

DESIGN

With the info from the collaboration, we then create design sketches to ensure all parties are on the same page and create a proposal

CLIENT APPROVAL

Next, when sketches are approved, we create the technical drawings for final approval

DELIVERY

Finally, delivery and the exciting part of bringing it all to life.

PLANTERS

An entirely custom product, we provide in-depth expertise to bring your designs to life. Custom planters can be made in Corten Steel or Powder Coated Aluminum and be built with multiple features including: custom benching, lighting, speakers, signage and more.

EDGING

A modular system that fastens together to create any layout required. All dimensions are custom and both Curved and Linear modules can be used in a single layout.

Reinforced internally with fasteners for increased structural integrity

Standard and custom options available

Bench seating can be customized to any shape and layout
