

The image features three potted plants arranged on a bed of light-colored gravel. On the left is a tall, slender plant with a thin, light-brown stem and a cluster of small, white, star-shaped flowers at the top. In the center is a smaller, rounded pot containing several spherical, white, pom-pom-like flowers. On the right is a medium-sized, rounded pot filled with a dense cluster of small, white, star-shaped flowers. The background consists of a dark, vertically-slatted wall and a dark, corrugated metal roof. The ground in the foreground is covered in light-colored gravel, and a strip of green grass is visible behind the gravel.

Steen Series

By Green Oasis

Steen Series

A collection of cement-like planters that seamlessly blend modern form with enduring functionality. Inspired by Dutch design and crafted from a composite of fiberglass, cement, sand, and finely ground stone, the Steen Series achieves the timeless allure of natural cement while remaining lightweight.

Suitable for Interior and Exterior Use

Frost and UV Resistant for Lasting Durability

Lightweight and Easy to Position

Backed by a 5-Year Warranty

Our Collaborative Approach

1

Discovery Call

An initial consultation to gather key details, including design intent, floor plans, interior finishes, timelines, and project goals.

2

Design Package

We provide a design package including curated plant and planter styles, detailed product specifications, and budget projections to complement your space and vision.

3

Installation

Our trained and certified horticulturists ensure a seamless process, managing delivery and installation with precision and care.

4

Continued Care

We also offer ongoing plant care, led by our team of horticulturists, to ensure the vitality and beauty of your biophilic products.
